

## Job Description

### 1. POSITION

**Position:** Field Engineer

**Reports to:** Field Service Manager

**Type of employment:** Full time

**Location:** Oklahoma City, OK.

### 2. DESCRIPTION OF POSITION

The Field Engineer is responsible for running Ziebel services at client locations primarily onshore US or as required worldwide, focusing on quality and safety, by performing the following duties personally or through subordinates.

#### **Responsibilities / tasks:**

- Ensure personal safety and the safety of others at all times.
- Maintain all HSE standards as set forth by company policy and customer contracts.
- Plan each field service in accordance with client needs, with the ability to advise clients on the technical capabilities and installation requirements of Ziebel products.
- Perform field installations and operations of existing and new Ziebel technologies, according to operational procedures and company quality standards.
- Field equipment maintenance, inventory and replacement.
- Preparation and maintenance of service quality records.
- Preparation and maintenance of pre and post job reporting.
- Work closely with the client before, during and after the job, making sure that clients' requirements are satisfied.
- Identify opportunities for Ziebel products.
- Preparation of case history material.
- Perform to annual metrics as established by the management team.

### 3. REQUIREMENTS

#### **Formal Qualifications & Experience**

- Degree in a technical discipline preferred.
- One to Two years field experience operating wireline or coiled tubing well intervention services is preferred, but not a requirement.
- Background in well logging and monitoring, with the capability to install and operate data acquisition systems.
- Practical knowledge of Distributed Temperature or Acoustic Sensing would be a distinct advantage.

- Training and experience in HSE as it pertains to running and installing well monitoring equipment.
- Ability to present technical ideas verbally and in writing.
- in mind.
- Understanding and knowledge of at least one of the following:
  - ✓ Permanent monitoring
  - ✓ Production logging
  - ✓ Intelligent wells
  - ✓ Knowledge of well completions and components

**Personal qualities:**

- Communicates clearly and persuasively in positive or negative situations, listens and obtains clarification when necessary.
- Demonstrates enthusiasm for doing the job right.
- Not afraid to admit lack of knowledge or understanding – willingness to learn.
- Will persevere to solve difficult problems or work through difficult situations.
- Is able to work effectively independently and as part of a team.
- Treats people with respect, works ethically and with integrity.

**Languages:**

- Excellent command of English is required, both verbally and written.
- Working knowledge of Spanish would be an advantage.

**Other Requirements:**

- Clean driving license and ability and willingness to travel overseas.
- Must be a US citizen or possess a valid visa to work in the US.

**Ziebel values:**

- Teamwork (to use own capabilities for the best of the team).
- Creative / innovative capability (challenge status quo, seeks new solutions).
- Sharing (the attitude and behavior of generously sharing one's capabilities).
- Professionalism (deliver the highest quality, on time every time).
- Integrity (doing the right thing even if nobody is watching).

**We offer:**

- A challenging and rewarding role in a cutting edge well intervention technology company.
- Competitive compensation and benefits.
- A stimulating working environment with a strong focus on knowledge sharing and co-operation.
- Opportunities for career and personal development.

If you meet the above requirements and believe you have what it takes to join our Ziebel team, then please send your resume and a covering letter by email to [careers@ziebel.com](mailto:careers@ziebel.com)
